DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Said "guiding devices on the chip" and "redistribution layer" are indefinite since there is nothing in the claim that define what exactly were guided and distributed by the claimed elements.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2 are rejected under 35 U.S.C. 102(b) as being anticipated by Bernstein et al (6,548,338).

The patent discloses a chip (50) in figure 2 having a decoupling capacitor composed of plates (57 and 59) sandwiching a dielectric film (58) on one of the major surfaces (51). In column 1, last paragraph, the patent discusses the intention of the configuration as being to increase chip capacitance and overcome noise associated with the chip.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PN: 6,410,431 (figure 20).
